

PACKERLAND RENT-A-MAT, INC.

Southeast Wisconsin's #1 Source For Professional Commercial Carpet Cleaning Services

YOUR PROFESSIONAL CARPET CLEANING TEAM

When determining which carpet cleaning service is best for your business, look for the company that has the most experience cleaning Wisconsin's businesses. Packerland provides the quality and level of services that leading businesses such as US Bank and Associated Bank demand. Since 1969, Packerland has provided commercial carpet cleaning, furniture cleaning and office panel cleaning to Southeastern Wisconsin companies that desire true value from every dollar invested in building maintenance. Packerland's managers and cleaning technicians, equipped with the latest cleaning tools, bring years of experience into your business. Why trust your commercial carpet cleaning needs to anyone else?

- Packerland's truck-mounted steam extraction units employ state-of-the-art carpet cleaning technology. Truck-mounts outperform both portable extractors and dry chemical methods.
- Packerland's truck-mounts are equipped with 500 gallon supply and recovery tanks...we supply our own water and dispose of wastewater properly at our facility—not yours.
- Packerland is exclusively a commercial carpet cleaner; our crews are trained to be professional cleaning technicians, not salespeople.

Packerland Cleaning Methods And Services

- Packerland uses the extraction method of carpet cleaning
- Truck Mount Units
 - Each truck mount is equipped with 500 gallon supply and recovery storage tanks. Packerland fills and disposes of water at our facility thus eliminating the disposal of wastewater at your facility.
 - Truck mount units generate approximately 450 psi of water pressure at 180°F to 250°F. Truck mounts extract water with approximately 15 lbs of vacuum.
 - Water pressure and temperature is adjusted based on the type of carpet and soil for optimum cleaning performance.
 - High vacuum pressure reduces residual water and decreases dry times.
 - Packerland makes every effort to utilize truck mount units whenever possible due to their superior performance in comparison to portable extractors and dry chemical methods.
- Portable Units
 - Portable units generate 150-200 psi of water pressure. Portables have no internal water heating; water temperature is dependent on available tap water. Portables extract water with 6-8 lbs of vacuum.
- Packerland supplies drying fans at all work sites
- All crew members are uniformed Packerland employees supplied with photo ID badges
 - Crew members average (6) years of commercial carpet cleaning experience
 - Packerland is exclusively a commercial carpet cleaner; our crews are trained to be cleaning technicians, not salespeople.
- Packerland will pre-spot when necessary
- Management personnel will inspect all work the morning following the job to determine if the job is completed satisfactorily. Rework and/or spotting can be facilitated if necessary.
- Packerland is prepared to meet all customer safety standards
- Packerland works around your business's schedule to minimize distractions to your employees.

Available Programs and Options

- Spotting programs can be scheduled for regular inspection of common areas and/or high traffic areas
 - Spotting frequency schedules can be arranged to coincide with the specific needs of each facility
 - Scheduled spotting and subsequent communication by Packerland gives facility managers additional support determining areas that need attention
- Common area cleaning programs can be scheduled to increase the frequency of cleaning in high traffic/high visibility areas
 - Common area frequency schedules can be arranged to coincide with the specific needs of each facility
- Furniture and office panel cleaning is available
